The Shore Club's Long Bay Beach Makes "10 Best Island Beaches Around the World" List

Long Bay Beach, the address for the Shore Club Turks and Caicos, has been named a favourite on the "Top International Islands for Beaches" by Condé Nast Traveler.

Condé Nast described Providenciales as, "Surrounded by the world's third largest barrier reef, all of the beaches here are protected from ocean surges and most are completely waveless. Long Bay is one of the least developed."

Hartling Group CEO Stan Hartling says that Long Bay Beach is that and more. "I used to live on Long Bay Beach, so I truly appreciate how genuinely idyllic and special this beautiful stretch of sand on Providenciales really is. When I decided to create the Shore Club – the first commercial development on Long Bay – I took the undertaking very seriously to ensure that our resort complements the magnificent landscape."

Long Bay Beach is located on the southeast shore of Providenciales. It is 2.4 miles long and sparsely populated with luxury residences. The water is shallow and clear, making the beach ideal for various water sports. Constant tradewinds on this coast invite kite boarders and windsurfers to test their skills.

The Shore Club is now under construction. The \$100 million condominium hotel is the third project by the award winning Hartling Group on Providenciales. The Shore Club features 38 condos and six luxury villas on a nine-acre parcel of land occupying 820 feet of beachfront on Long Bay. Cayman Islands' DECCO, a Dart Enterprises company, is providing construction financing and management.
