

Artist Chris Pendergast Commissioned to Produce Exclusive Artwork for The Shore Club

We are pleased to announce that esteemed artist Chris Pendergast has been commissioned to produce an exclusive limited edition print series for the residences at The Shore Club.

Chris is a graduate of the School of the Art Institute of Chicago. He grew up in Europe but now makes Lowell, Massachusetts his home. His work is exhibited in galleries in New York, Florida, Massachusetts and Rhode Island. Chris is also an Adjunct Faculty Member at Lesley University College of Art and Design.

His work captures both highly representative and heavily abstracted elements. The expressive nature of the abstract exists in the contrast to the representative facets of his work. Chris will exhibit these beautiful contrasts in the art he produces for The Shore Club. We are most fortunate that Long Bay and Turks & Caicos will be the subject of his first Caribbean series of work.

The work that Chris produces will be part of a larger collection for The Shore Club that is being created by local and international artists alike.

"I am so very pleased to be invited to develop a body of work for The Shore Club. Turks and Caicos, and Long Bay in particular, is such an inspirational and beautiful place. It is a privilege to be working with The Hartling Group in this capacity."

Chris Pendergast

"Having Chris produce custom art work for The Shore Club is another example of our commitment to building a truly unique and bespoke resort.

We are so excited to be able to work with Chris, not only because he is such a talented artist, but also because he has invited us to be engaged in the creative process.

In the near future, we will be sending out a link to a web page where you can log on and view updates of the work that Chris is producing for The Shore Club. Owners in particular will be able to enjoy the opportunity of watching the progress on the limited edition art work that will be displayed in their condo."

Stan Hartling, CEO,
The Hartling Group
